Objective: I'm looking to work for a company where I can apply my full-stack development skills, building automation scripts and working with various frameworks.

EDUCATION

University of Miami

Bachelor of Arts in Computer Science

- **GPA:** 3.70 / 4.00

Coral Gables, Florida

May 2026

WORK & LEADERSHIP EXPERIENCE

WebEaze Web Design

Founder & Full Stack Engineer

Coral Gables, Florida

Oct 2024 – Present

- Founded and scaled a subscription-based web platform delivering 40+ user-facing, responsive websites for small businesses.
- Designed frontend systems using React, JavaScript, HTML, and CSS, emphasizing reusable components, performance, and accessibility.
- Built custom JavaScript automation scripts to streamline client onboarding and internal workflows, reducing manual overhead.

Ibis Prep

Computer Science & Mathematics Tutor

Coral Gables, Florida

Nov 2024 – Present

- Designed coding exercises and structured curricula in Python and Java for 150 students, improving their test scores by 15%.
- Developed technical lesson materials covering data structures, algorithms, and programming fundamentals, improving student comprehension.

Fizz Social Corp.

Social Media Analytics Intern

Remote

May 2025 – Sep 2025

- Analyzed user onboarding and retention data using SQL and Excel to identify drop-off patterns and inform growth strategy.
- Tracked and reported on key engagement metrics including signups, retention rate, and social media impressions to support product decisions.
- Designed and prototyped personalized app features in Figma tailored to individual school profiles

Spotify

Data Engineering Intern

New York City, New York

Jun 2025 – Aug 2025

- Optimized a daily data pipeline using Apache Spark and Java to process partitioned user listening logs, cutting compute costs by 14% and reducing data ingestion latency.
- Designed an automated data validation and quality control workflow to detect anomalies in streaming audio metadata which prevented corrupt data from reaching downstream dashboards.
- Collaborated with experienced engineers in an agile environment, participating in code reviews, testing, and iterative development cycles.

University of Miami Information Technology

Information Technology Lab Technician

Coral Gables, Florida

Sep 2022 – May 2026

- Managed lifecycle, imaging, and deployment of 500+ devices using Excel and Workday, ensuring compliance and security standards.
- Provided hardware and software support for faculty, staff, resolving over 200 tickets per week with a 70% average reduction in resolution time.

Delaware Elevator, Inc.

Information Technology Intern

Salisbury, Maryland

Jun 2023 – Aug 2024

- Built Python and JavaScript automation scripts that reduced help desk response times by 30%.
- Developed Power BI dashboards integrated with Microsoft Dynamics to track and visualize the performance metrics for company stakeholders.
- Supported data modeling and reporting improvements, translating raw data into structured insights for leadership decision-making.

Alpha Kappa Psi

Administrative Director

Coral Gables, Florida

Dec 2024 – May 2025

- Built and maintained the organization's official website using React, HTML and CSS, improving information accessibility and user experience for a chapter of 250+ members.

PROJECTS

Palmetto Goodwill Application Prototype

University of Miami Capstone Project

Coral Gables, Florida

Spring 2026

Stack: Figma, JavaScript, HTML/CSS

- Led IT & networking taskforce with a 30-person cross-functional team to design a full mobile application prototype for a real nonprofit client.
- Designed and prototyped core features including a customer loyalty system, donation capture and scheduling, location finder, and online shopping experience using Figma and AI-assisted development tools.
